Authorized to work in the US for any employer

WORK EXPERIENCE

## Web Developer

Cardinal Health - OH  -

November 2016 to Present

Description: Project deals with SSO, which is a user authentication process that permits a user to enter one username and password in order to access multiple applications/accounts. Providing same look and feel for each & every client with dynamic rendering of client specific page content, branding etc.,
Responsibilities:
• Reviewed BRD, SRS, TDD and all project related documents.
• Adopted the Agile methodology and followed the scrum process.
• Worked extensively on Angular.JS, bootstrap, HTML5, CSS3, JSON, Media queries for various breakpoints in the adaptive web-designing environment.
• Designed and developed dynamic web pages using Angular, HTML5, CSS3 and Java Script.
• Involved in Scrum meetings with aggressive time frame.
• Developed the Responsive design to make the portal compatible with Mobile/Tablets/PCs/MAC by defining media queries and collaborating with UX designers.
• Integrated backend Rest services by coordinating with backend team.
• Worked with Code Standardizing team in order to Guide UI team to maintain code standards.
• Performed Unit testing with Jasmine to make sure the coding works as expected.
• Created cross-browser compatible and standards-compliant CSS-based page layouts.
• Worked on cross browser compatibility issues maintain, enhance, and recommend solutions that best suit business and technology needs from UI standpoint.
• Source code is maintained by GIT Enterprise
• Strong communication, analytical and interpersonal skills working within cross-functional teams.

Environment: HTML5, CSS3, Angular.JS, Bootstrap, JSON, web services, Sublime Text, Apache and Static server access and JavaScript (Debugging tools).

## Web Developer

Megasoft Ltd-India  -

April 2013 to July 2015

This Project involves in refactoring Runtime Business Objects and align them with meta-model framework. It is a follow up project for meta-model Phase1 project.
Responsibilities:
• Involved in the waterfall development methodology which later transformed to Agile using scrum
• Responsible to develop web application with Web API and AngularJS.
• Involved in database design in SQL server 2014 using SQL server management studio.
• Developed application by implementing the Single Page application (SPA) using ui-router.
• Created and utilized Web API methods for database operations (CURD) with the use of Entity Framework 5 to access and manipulate the data in the database.
• Created functional components using AngularJS Models, Factories, Services, and Controllers.
• Applied Singleton and Factory design patterns with dependency injection by injecting the View Model and Utility classes into Controller for better code reusability.
• Used AngularJS services like $broadcast, $emit and $ rootScope for data communication among controllers in the application.
• Used AngularJS $http (post and get) to retrieve and manipulate the data through Web API from Entity Framework.
• Implemented and designed form validation for inputs of the web page using normal HTML checking and handle them using ng-show, ng-hide, ng-disable and specific AngularJS Validator directive (ngRequired).
• Used filters to format the data to display them in better manner. (Date, Order by, etc.)
• Applied one way binding on expressions that used ng-repeat to reduce number of watchers and enhance the performance.
• Designed the page using Bootstrap and some custom CSS style sheet.
• Debugged and tracked the application using Batarang tool in Chrome browser.
• Implement unit testing using Jasmine throughout application development phases.
• Involved in developing WCF Services and consumed third party services.
• Used JIRA as management tool and Team Foundation Server as a version control.
Environment: AngularJS 1.5, SQL server 2014, IIS 8, HTML5, CSS3, Web API, XML, JSON, Batarang, Balsamiq, Jasmine, JIRA and TFS.
Experience and Responsibilities:
• Utilized the latest front end Technologies such as HTML5 and CSS3 for layouts and Canvas.
• Worked on CSS Background, CSS Positioning, CSS Text, CSS Border, CSS Margin, CSS Padding, Pseudo Classes and CSS Behaviors in CSS.
• experience on implementing the AJAX features using JavaScript and server side
• Incorporated the table less design methodology using CSS3 that follows W3C standards.
• Significant experience on web application debugging skills using Firefox, Chrome developer's tool and Firebug Expertise in advanced JavaScript libraries and frameworks.
• Involvement in using various IDE's, Dreamweaver, Notepad++, Eclipse, Sublime Text Editor.
• Knowledge in creating Object-Oriented Web application utilizing MVC architecture.
• Worked in multiple projects on Agile Dev Team methodology and worked on Waterfall method.
• Worked on web applications that required cross browser compatibilities like Chrome, Safari and Firefox, Internet Explorer and Opera and also SEO optimization.

• Experience in interacting with clients/users in gathering the user requirements.
• Involved in Understanding functional specifications and developing creative solutions to meet business requirements.
• Strong communication skills, a team player, can adopt new tools and technologies, a quick learner and ability to gather and filter requirements.

EDUCATION

## Master's in Information Technology

Delaware university

August 2015 to December 2016

## Bachelor of technology in ECE

JNTU  -  Kakinada, Andhra Pradesh

May 2013

SKILLS

BOOTSTRAP (3 years), HTML5 (3 years), JAVASCRIPT (3 years), JSON (3 years), TESTING

(3 years)

• Operating Systems: Windows, UNIX and Red Hat Linux.
• Programming languages: C, C#, ASP.net, SQL, PHP, Spring MVC, SQL, PL/SQL and MySQL.

• Databases: Oracle 11g, SQL Server.
• Web Technologies /
Languages

HTML5, XML, CSS3, JavaScript, Bootstrap, DOM, JSON, Ajax, Node.js, JSP, AngularJS and JQuery.

• IDE/Editors: Sublime Text, Eclipse IDE, Notepad++, Adobe Photoshop, AEM (Adobe Express Manager).
• Other Applications:: MS Office, Visio, Project and Lotus Notes
• Testing tools: HP ALM, HP Quality Center, BugZilla and RQM
